Hans and Bettie,

Here is the Gannt Chart for the long term Accord study. Please disregard the Neptune dates as we will no longer use that site as I mentioned on Friday. Also, please do not rely on the Ames sample dates at the bottom. I had put that section together to give Lyon a rough idea of when they would receive samples. Just this morning, I adjusted the Phoenix dates based upon some new information and I am not sure that I have the Ames dates correctly linked to move accordingly. I thought that it was more important to get this out to you as soon as possible. I will verify the accuracy of the Ames dates later this week.
